

MIKE DIDOMIZIO

SOFTWARE DEVELOPER

Ottawa, Ontario
K1Y 4T1

E: mikedidomizio@gmail.com
T: **+1-613-806-0770**

Hi - I'm Mike, and programming is my passion.
Check out some of the awesome things I've done below.

Working Experience

THALES CANADA

Scrum Master/Software Developer

July 2017 - Present

My involvement and skill set with Thales Canada includes the following:

- Work closely with Product Managers to t-shirt size features with our team and give estimated delivery date with previous sprint velocity
- Conduct retrospectives on our sprint and work towards improving the efficiency of the team
- Hold daily scrums to ensure team is moving forward and be able to help and guide the team
- Help with Pager Duty incidents to ensure minimal downtime
- Run lunch and learn events to further develop teams skill sets
- Complete breakdown and implementation of full stack objectives

IDS NORTH AMERICA

Lead Developer

July 2015 - July 2017

My involvement and skill set with IDS North America included the following:

- Lead developer on 12 person billing project
- Responsible for sprint planning and backlog refinement
- Written in Typescript/ES6 with ES7 experimental features
- Test Driven Development with Karma/Protractor E2E tests
- modularized SASS integration for compiling CSS
- Set up of common design, templating, shared AngularJS components for projects
- Automate CI/CD of projects through GulpJS and GitLab CI
- Set up custom Yeoman generators for scaffolding future AngularJS projects

SPOONITY

Mobile App Developer

February 2014 - July 2015

My involvement and skill set with Spoonity included the following:

- App development for all major mobile platforms (iOS, Android, WP8 and Blackberry)
- Apps support loyalty, gift card, and mobile ordering services
- Multilingualism built into apps/dashboard
- GruntJS set up to automate and minimize time developing apps

- Dashboard development for generating statistics for merchants
- Remote updating of mobile apps (eliminate the need to update through the app store)

MIDEOME

Lead Developer

2011 - 2013

My involvement and skill set with MideoMe included the following:

- Helping in architecture and managing a number of remote server setups, databases and infrastructures
- Developing and maintaining the back-end & front-end from ground-up using CodeIgniter as a framework
- Planning out solutions using appropriate and convenient scalable applications (like Wowza, Flowplayer, CodeIgniter, and many others)
- Experience and knowledge in integrating back-end code with Amazon's S3/Cloudfront service for scalability and easy accessibility
- Excellent time management skills as well as task planning
- Heavily using OOP and MVC for maintainability
- Set up and deployed AWS (EC2, S3, Cloudfront) servers for distributing files globally
- OOP and REST API set-up to ensure ease of cross-platform across multiple devices
- SQL database set up with multiple servers in mind
- Integrated with Facebook, Twitter, YouTube, Vimeo and Tumblr
- Polls the server for new content depending on which page you are on
- Developed the iOS application using a custom API token for the server back end

Education

POLICE FOUNDATIONS

Police Foundations Diploma

Ontario, CA
2003 - 2005

My time in Police Foundations was exciting to say the least. A few of the many things I learnt there were:

- How to work with people
- How to deal with stressful/unexpected situations
- Careful planning
- Time management skills
- How to develop as a person
- Broadening my mindset
- Building confidence and maintaining my perseverance in achieving my goals successfully
- Learning how to stay open to constructive criticism/feedback and using it to my advantage
